

# Quotation

## ◆Machined components

- Company I asked: Suzuno-giken
- Price: 2,600,00 yen(rough quotation if milling machines are used)

This price will be varied depending on tolerance and machining method.

Asking all components to KEK machine shop will not be accepted, I think.

## ◆Commercial components

- Misumi

- Price: 100,000 yen(for a set of the installation frame)

- Thorlabs

- Price: 200,000 yen(for 3 liner stages and optical posts)
