

Project Report

LCGT Japanese meeting, June 13, 2011

Takaaki Kajita

- The LCGT budget for the excavation of the underground lab. is in the FY2011 government budget.
- However, the government does not allow us to use the above budget now... (The cost estimate for the excavation was 30-60% more than the budget we have. → Re-designing of the underground lab. has started.)
- We can use the budget for Leading-edge Research Infrastructure Program (最先端研究基盤事業) without any delay.
- Budget request for FY2012 has been submitted: Building at Mozumi (800m²). (We do not know the decision at the University level yet.)
- The nickname of LCGT will be decided this week. (The decision has been delayed due to the earthquake.)

-- ICRR related --

- A part of ICRR GW members moved to a new building behind this one in May.
- Seiji Kawamura will be Professor at ICRR from July 1.
